Execution Evidence

AI-Powered Customer Support Triage System

---

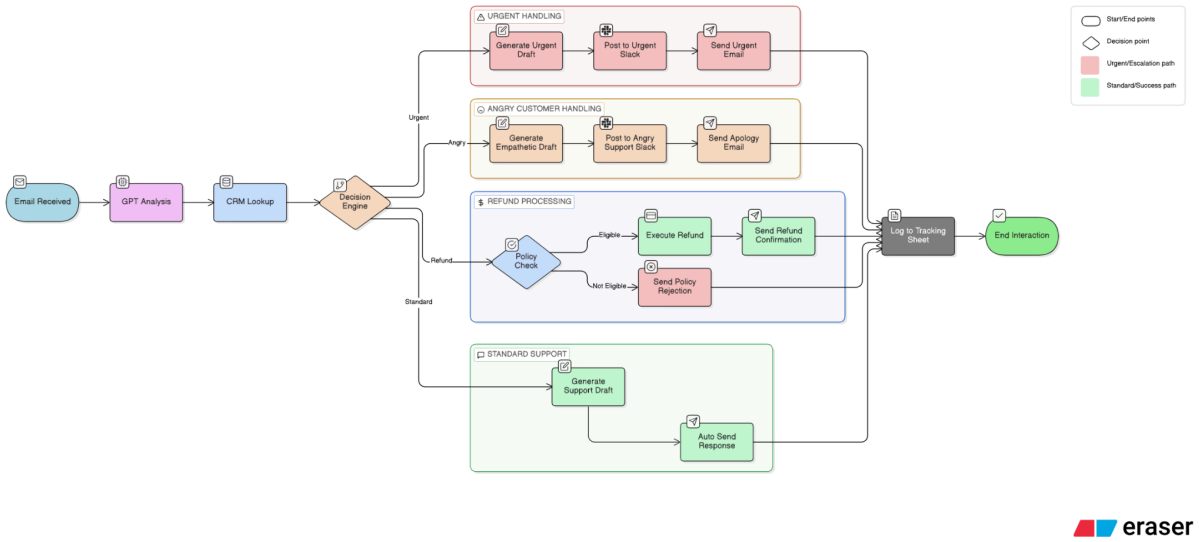
1. Introduction

This document provides execution evidence for the AI-powered customer support agent built using Relay.app. It demonstrates the end-to-end working of the system, including real test emails, AI decision-making, Slack escalations, automated responses, refund processing, and interaction logging.

The purpose of this document is to validate that the workflow is fully functional and handles different customer scenarios correctly.

---

2. System Architecture



eraser

Description

The system processes incoming emails and performs the following steps:

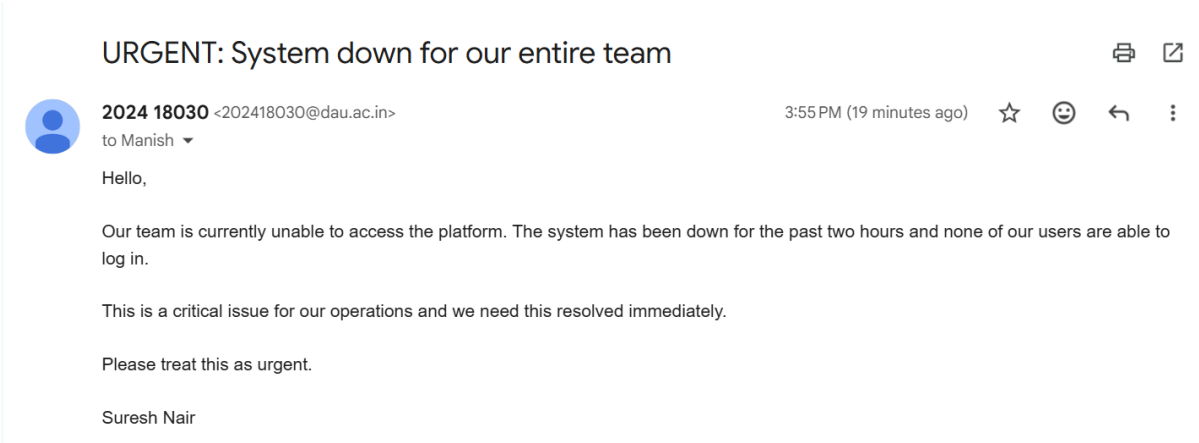
Manish Sharma

1. Email received (Trigger)
2. AI analyzes email content
3. Customer data fetched from CRM
4. Decision engine assigns category
5. Action executed based on category:
    - Urgent Escalation
    - Angry Escalation
    - Refund Processing
    - Standard Support
6. Interaction logged in tracking sheet

---

3. Test Case 1 – Urgent Issue

Customer Email



URGENT: System down for our entire team

2024 18030 <202418030@dau.ac.in> 3:55 PM (19 minutes ago)
to Manish

Hello,

Our team is currently unable to access the platform. The system has been down for the past two hours and none of our users are able to log in.

This is a critical issue for our operations and we need this resolved immediately.

Please treat this as urgent.

Suresh Nair

Example:
Subject: URGENT – System down for our team

System Behavior

- AI detected sentiment: **Urgent**
- Category assigned: **Human Escalation – Urgent**
- Actions performed:
    - Draft generated by AI
    - Message sent to Slack channel **#urgent_solution**
    - Acknowledgment email sent to customer

Slack Notification

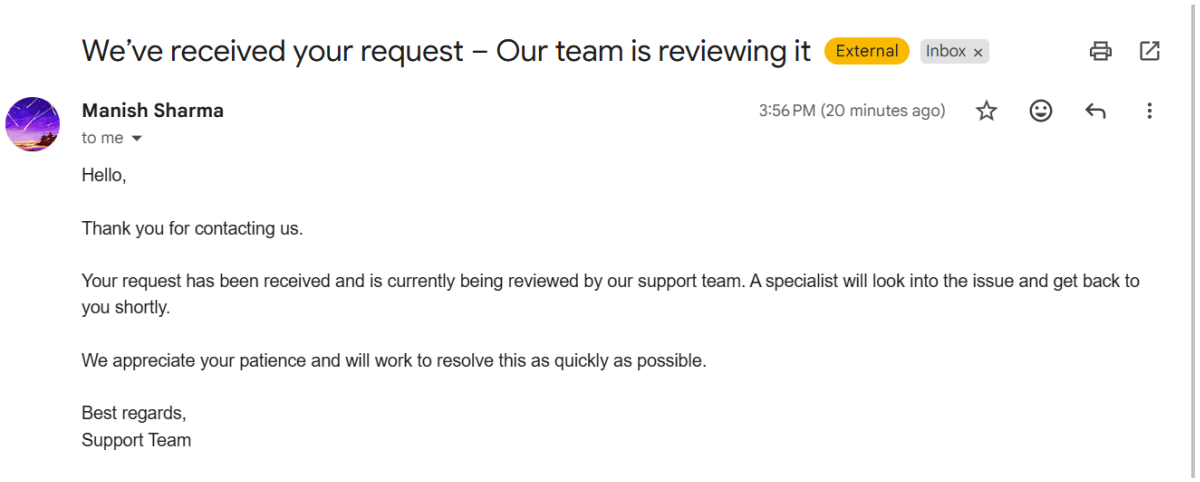
Customer Response

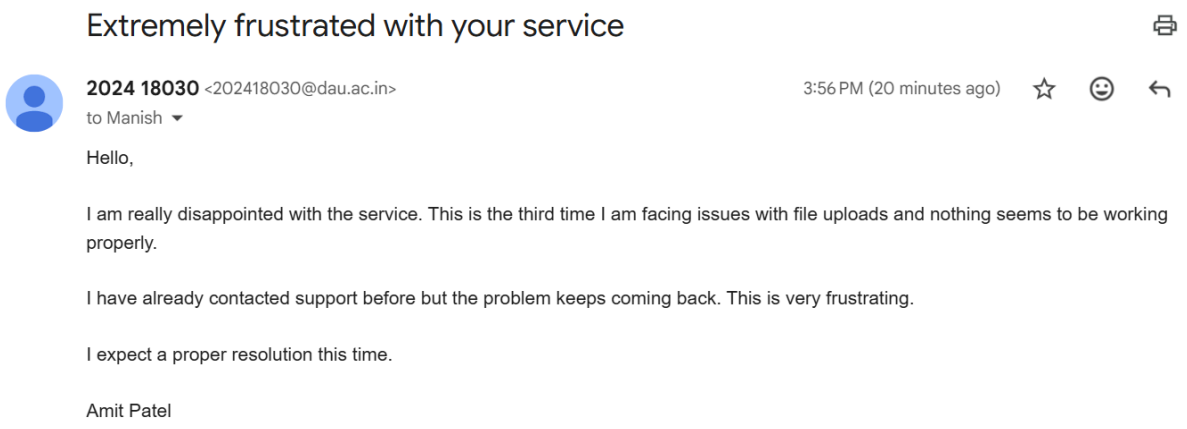


---

4. Test Case 2 – Angry Customer

Customer Email

Manish Sharma



Extremely frustrated with your service

2024 18030 <202418030@dau.ac.in> 3:56 PM (20 minutes ago)

to Manish

Hello,

I am really disappointed with the service. This is the third time I am facing issues with file uploads and nothing seems to be working properly.

I have already contacted support before but the problem keeps coming back. This is very frustrating.

I expect a proper resolution this time.

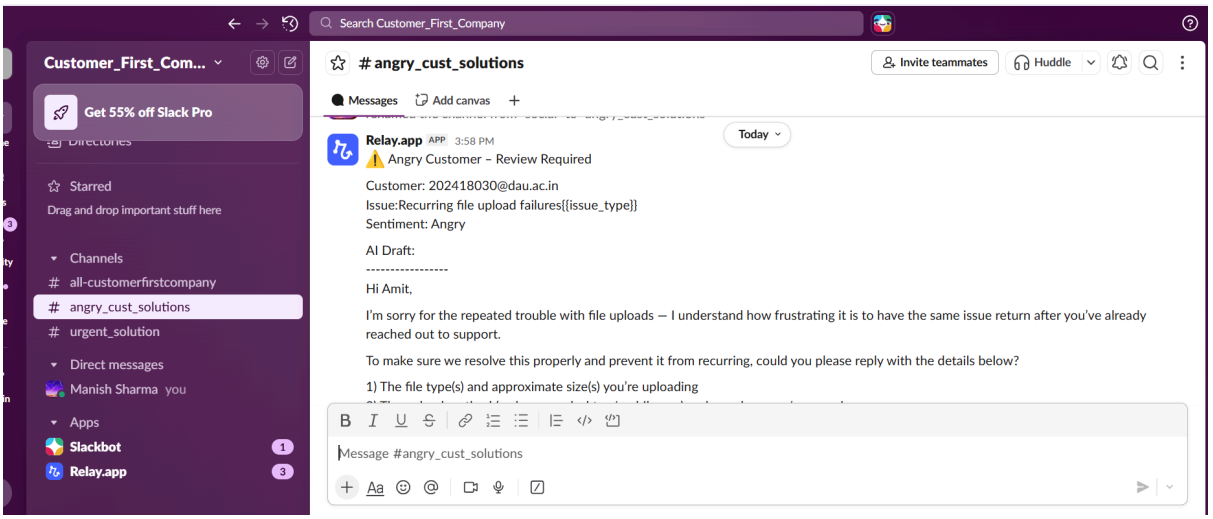
Amit Patel

Example:
Subject: Extremely frustrated with your service

System Behavior

- AI detected sentiment: **Angry**
- Category assigned: **Human Escalation – Angry**
- Actions performed:
  - Empathetic draft generated
  - Message sent to Slack channel **#angry_cust_solutions**
  - Apology email sent to customer

Slack Notification



Customer Response

Manish Sharma

We're sorry for the inconvenience – We're looking into this External Inbox ×

Manish Sharma 3:58 PM (19 minutes ago)
to me

Hello,

We sincerely apologize for the inconvenience you've experienced.

Your concern has been escalated to our support team for priority review. A specialist will contact you soon to assist further.

We appreciate your patience and the opportunity to make this right.

Support Team

---

5. Test Case 3 – Refund Request

Customer Email

Request for refund – duplicate charge

2024 18030 <202418030@dau.ac.in> 3:57 PM (21 minutes ago)
to Manish

Hello Support Team,

I was charged twice for my subscription this month. It looks like a duplicate transaction from your side.

Could you please check and process a refund for the extra amount?

Thank you,
Rohit Mehta

Example:
Subject: Request for refund – duplicate charge

System Behavior

- AI detected issue type: **Refund**
- Refund eligibility checked using company policy:
  - Within 7 days
  - Valid reason
  - Plan type eligible
  - Complaint history within limit

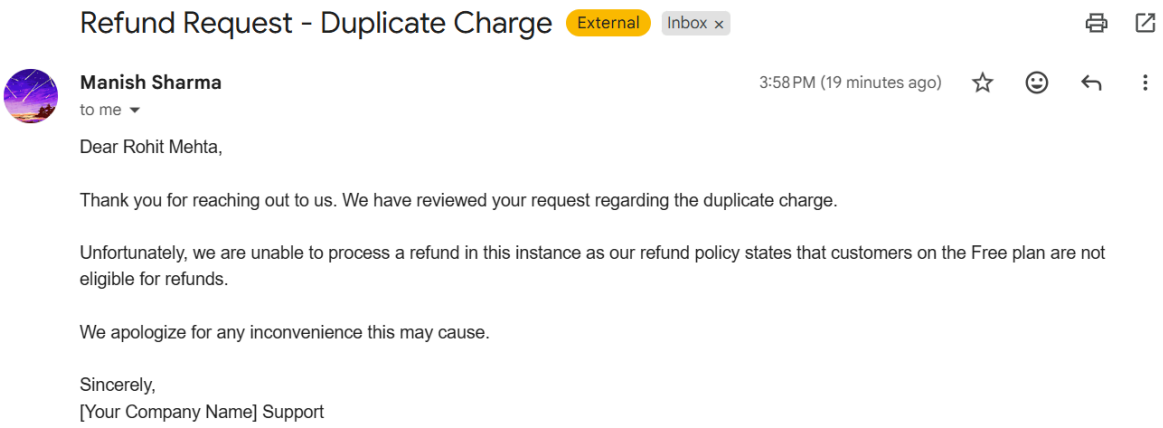
Case A – Eligible

Manish Sharma

- Refund approved
- Confirmation email sent

Case B – Not Eligible

- Refund rejected
- Policy explanation email sent



Refund Request - Duplicate Charge External Inbox ×

Manish Sharma 3:58 PM (19 minutes ago)
to me

Dear Rohit Mehta,

Thank you for reaching out to us. We have reviewed your request regarding the duplicate charge.

Unfortunately, we are unable to process a refund in this instance as our refund policy states that customers on the Free plan are not eligible for refunds.

We apologize for any inconvenience this may cause.

Sincerely,
[Your Company Name] Support

---

6. Test Case 4 – Standard Support

Customer Email

Example:
Subject: How to change notification settings?

System Behavior

- Sentiment: Normal
- No refund request
- Category: **Standard Support**
- AI generated response
- Email sent automatically to customer

---

7. CRM Data (Customer Lookup)

Manish Sharma

	A	B	C	D	E	F
1	Email	Name	Plan_Type	Customer_Value	Past_Complaints	Refund_Eligible
2	rahul.sharma@g	Rahul Sharma	Free	Low	0	Yes
3	priya.verma@gm	Priya Verma	Pro	Medium	1	Yes
4	amit.patel@gma	Amit Patel	Enterprise	High	2	Yes
5	neha.singh@gm	Neha Singh	Free	Low	0	No
6	rohit.mehta@gm	Rohit Mehta	Pro	Medium	3	Yes
7	anita.jain@gmail	Anita Jain	Enterprise	High	1	Yes
8	vikas.gupta@gm	Vikas Gupta	Free	Low	0	Yes
9	kavita.reddy@gn	Kavita Reddy	Pro	Medium	2	No
10	suresh.nair@gm	Suresh Nair	Enterprise	High	4	Yes

The CRM contains:

- Customer Email
- Plan Type (Free / Pro / Enterprise)
- Customer Value
- Past Complaints
- Refund Eligibility

This data is used by the decision engine to determine priority and refund eligibility.

---

8. Slack Integration

The system sends real-time notifications for high-risk cases:

Scenario	Dedicated Channel
Urgent Issue	#urgent_solution
Angry Customer	#angry_cust_solutions

Slack messages include:

- Customer email
- Plan type
- Issue summary
- Sentiment
- AI-generated draft

Manish Sharma

9. Interaction Logging

All actions are recorded in a tracking sheet.

12/02/2026	202418030@dau	technical	urgent	Free	Human Escalation
16/02/2026	202418030@dau	technical	urgent	Free	Platform outage / users unable to log in
16/02/2026	202418030@dau	refund	normal	Free	duplicate charge
16/02/2026	202418030@dau	technical	angry	Free	Recurring file upload failures

Fields include:

- Date & Time
- Customer Email
- Issue Type
- Sentiment
- Category
- Action Taken

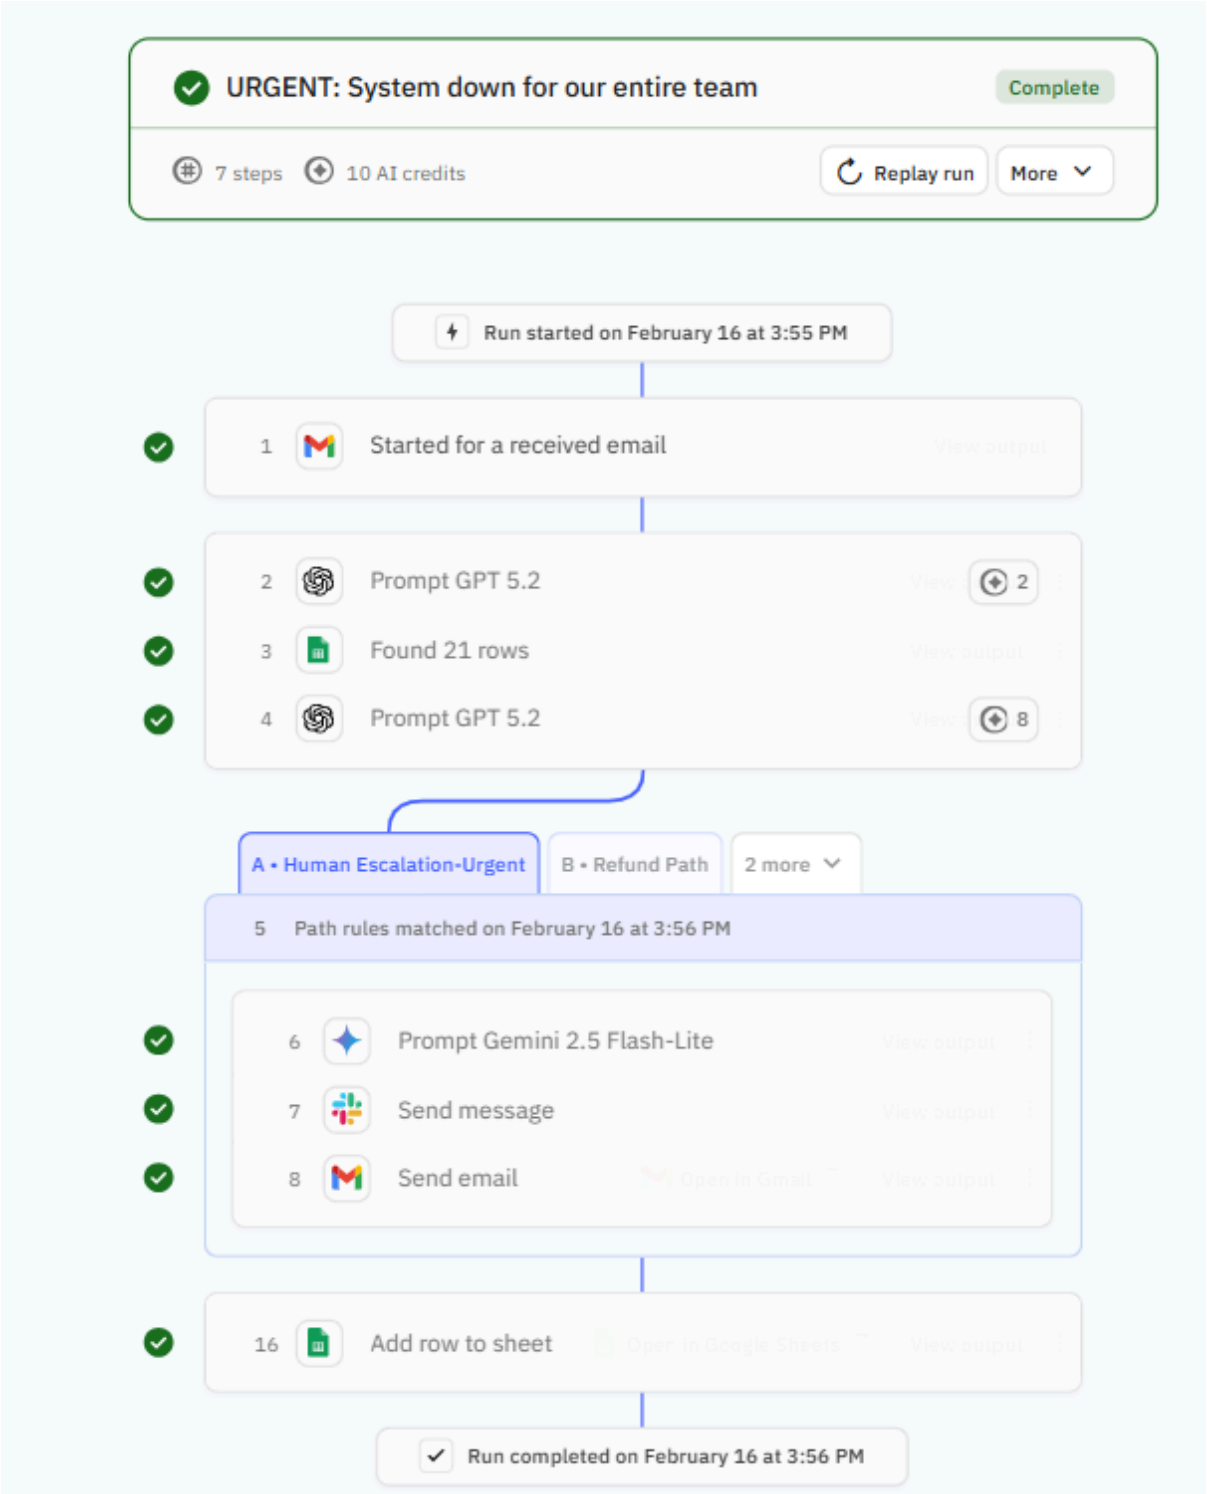
This enables:

- Performance monitoring
- Audit trail
- Analytics

---

10. End-to-End Workflow Example

Manish Sharma



This shows the complete execution path taken for a test email.

---

11. System Capabilities Demonstrated

Manish Sharma

- Automated email analysis using AI
- Sentiment detection
- Context-aware decision making
- Policy-based refund automation
- Human-in-the-loop escalation
- Automated customer communication
- Real-time Slack alerts
- Interaction logging and tracking

---

12. Conclusion

The execution results confirm that the AI-powered support agent successfully handles multiple customer scenarios with minimal human intervention. The system improves response time, reduces manual workload, and ensures high-priority customers receive immediate attention.
